Studio 2 - Complete Changes Summary

Files Modified for Complete Isolation

1. Configuration Files

`.env` - Environment Variables

Status: REPLACED with new configuration
- New SQLite database URL: `file:./studio_2.db`
- New NEXTAUTH_SECRET generated
- Comments added for clarity

`package.json` - Project Metadata

```
"name": "app" ⟶ "name": "studio-2"
```

`prisma/schema.prisma` - Database Schema

- **Line 4**: Prisma client output path updated
  to `/home/ubuntu/studio_2/node_modules/.prisma/client`
- **Line 8**: Database provider changed from `postgresql` to `sqlite`
- **Line 231**: `tags String[]` → `tags String` (comma-separated)
- **Line 383**: `linkedSchemas String[]` → `linkedSchemas String` (comma-separated)
- **All instances**: Removed `@db.Text` annotations (PostgreSQL-specific)

---

2. Branding Updates (NCP Studio → Studio 2)

`app/layout.tsx`

- **Line 10**: Title metadata updated

`app/auth/login/page.tsx`

- **Line 36**: Toast message updated
- **Line 53**: Page heading updated

`app/auth/signup/page.tsx`

- **Line 87**: Page heading updated

`app/schemas/page.tsx`

- **Line 9**: Page title metadata updated
- **Line 45**: Content text updated

`app/modes/page.tsx`

- **Line 9**: Page title metadata updated

`components/header-client.tsx`

- **Line 37**: Header branding updated
- **Line 52**: Header branding updated

`components/home-page-client.tsx`

- **Line 18**: Logo text updated
- **Line 122**: Footer branding updated
- **Line 128**: Copyright text updated

`scripts/seed.ts`

- **Line 22**: Organization name in seed data updated

---

3. Path References Updated

`test_bridge_fix.js`

- **Line 2**: `.env` path: `/home/ubuntu/ncp_studio/.env` → `/home/ubuntu/studio_2/.env`
- **Line 4**: Working directory: `/home/ubuntu/ncp_studio/app` → `/home/ubuntu/studio_2`

`scripts/reset-for-fresh-start.ts`

All instances of `/home/ubuntu/ncp_studio/app` → `/home/ubuntu/studio_2`:
- **Line 13**: Coachee profiles path
- **Line 16**: Uploads path
- **Line 19**: .next build directory path
- **Line 22**: Prisma migrate command
- **Line 29**: Prisma seed command
- **Line 54**: Coachee profiles cleanup path
- **Line 55**: .next cleanup path

New Files Created

`/home/ubuntu/studio_2/studio_2.db`

- SQLite database file (auto-generated during migration)
- Contains all tables and seeded data

`/home/ubuntu/studio_2/prisma/migrations/`

- Migration history directory
- Contains initial migration: `20251020094417_init/migration.sql`

`/home/ubuntu/studio_2/STUDIO_2_MIGRATION_GUIDE.md`

- Comprehensive documentation
- Setup instructions
- Troubleshooting guide
- Comparison table

`/home/ubuntu/studio_2/CHANGES_SUMMARY.md`

- This file
- Quick reference of all changes

Files Copied (Unchanged)

All other files were copied as-is from the original Studio app:
- All components (except branding updates)
- All API routes
- All utility libraries
- All data files (schemas, modes, etc.)
- All UI components
- All type definitions
- All configuration files (tailwind, typescript, etc.)

Database Changes

Structure Changes

1. **Provider**: PostgreSQL → SQLite
2. **Array Fields**: Converted to comma-separated strings
3. **Text Annotations**: Removed PostgreSQL-specific `@db.Text`

Data Independence

- Completely separate database file
- No shared data with original Studio
- Fresh seed data with "Studio 2" organization

Security Changes

New Authentication Secret

- **Purpose**: Isolate session management
- **Method**: OpenSSL random generation
- **Result**: JWT tokens not interchangeable between Studio and Studio 2

Total Files Modified

Category	Count	Details
Configuration	3	.env, package.json, prisma/ schema.prisma
Branding	8	UI components and pages
Path References	2	Scripts with hardcoded paths
Total Modified	13	
New Files	4	DB file, migrations, docu- mentation
Total Files Copied	250+	All other project files

Zero Impact Verification

Original Studio (/home/ubuntu/Uploads)

✅ **Unchanged** - No files modified
✅ **Independent** - Separate database
✅ **Operational** - Still fully functional

Studio 2 (/home/ubuntu/studio_2)

✅ **Isolated** - New database and configuration
✅ **Independent** - Separate branding and paths
✅ **Functional** - Fully operational clone

Quick Reference: Key Differences

Item	Original Studio	Studio 2
Project Name	app	studio-2
Display Name	NCP Studio	Studio 2
Database	PostgreSQL (Remote)	SQLite (Local file)
DB Location	Remote server	./studio_2.db
Auth Secret	Original	New/Independent
Prisma Output	/home/ubuntu/ncp_studio/...	/home/ubuntu/studio_2/...
Organization	NCP Studio	Studio 2

Commands for Reference

View All Changes

```
# Compare original and Studio 2
diff -r /home/ubuntu/Uploads /home/ubuntu/studio_2 --exclude=node_modules --exclude=.n
ext --exclude=studio_2.db
```

Verify Database

```
cd /home/ubuntu/studio_2
sqlite3 studio_2.db ".tables"
```

Check Branding

```
cd /home/ubuntu/studio_2
grep -r "NCP Studio" . --exclude-dir=node_modules --exclude-dir=.next
# Should return NO results
```
